Create IAM user and set up billing:

1. Open IAM: Search for IAM in the AWS Management Console and select the IAM service.

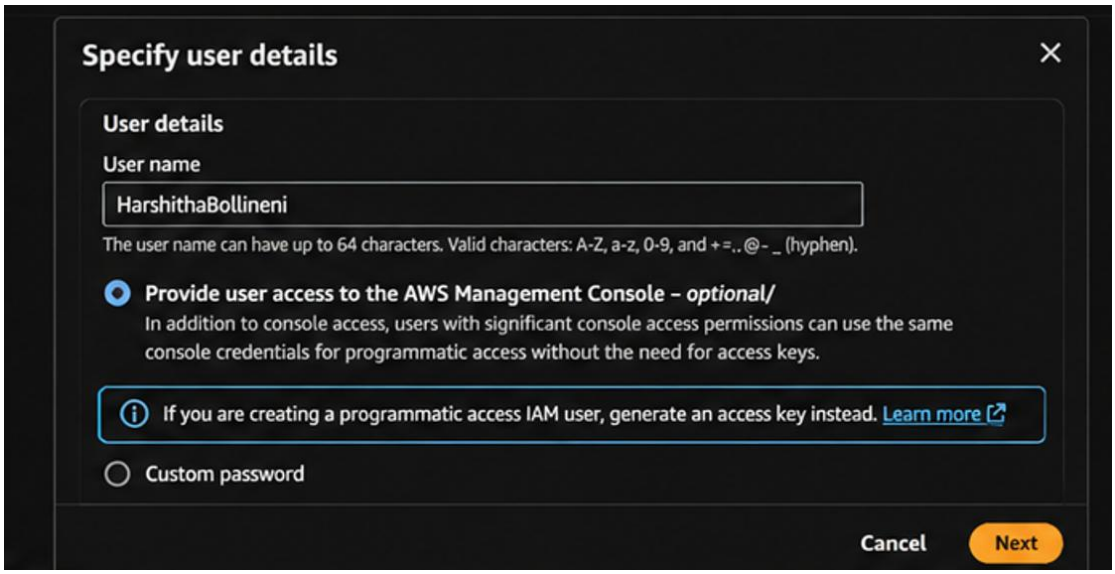

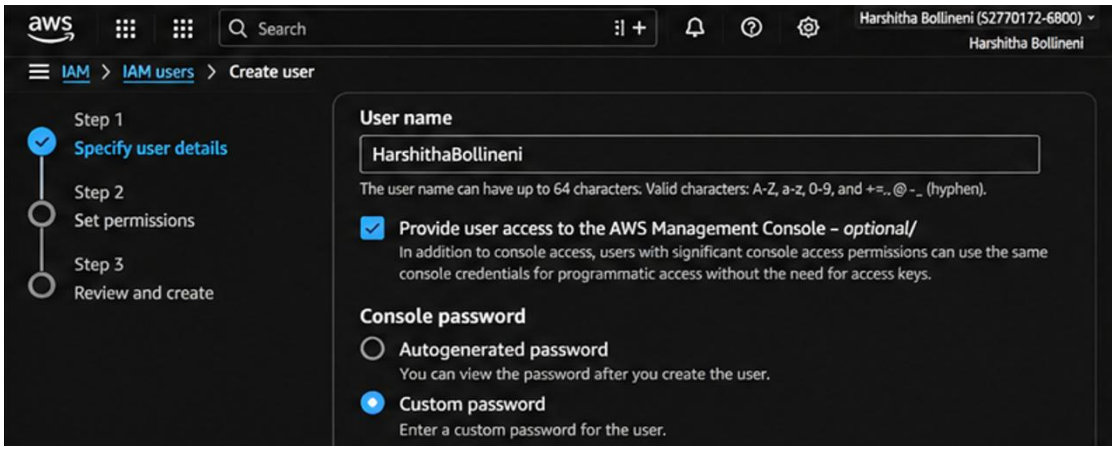

2. Navigate to IAM Users: Select IAM Users from the left-side menu and click Create user.

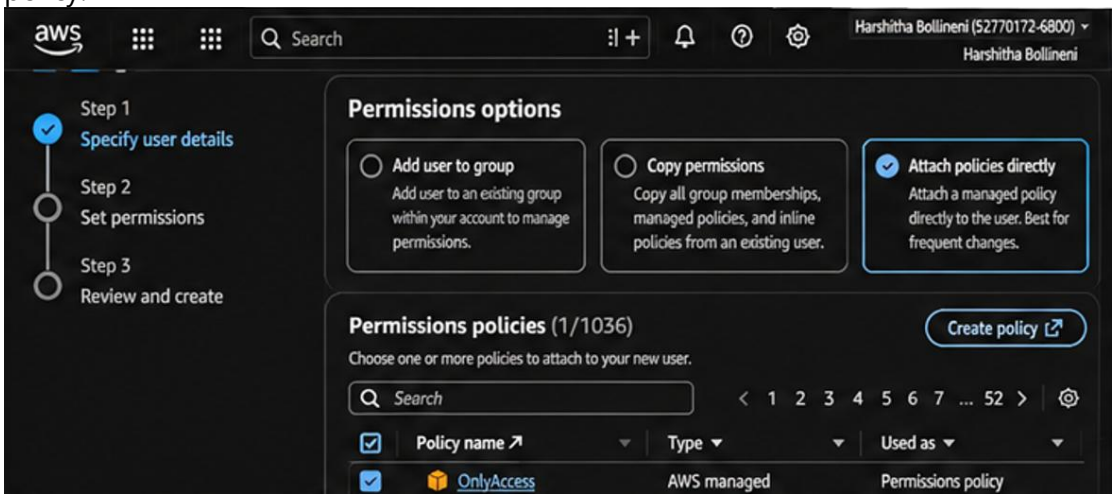

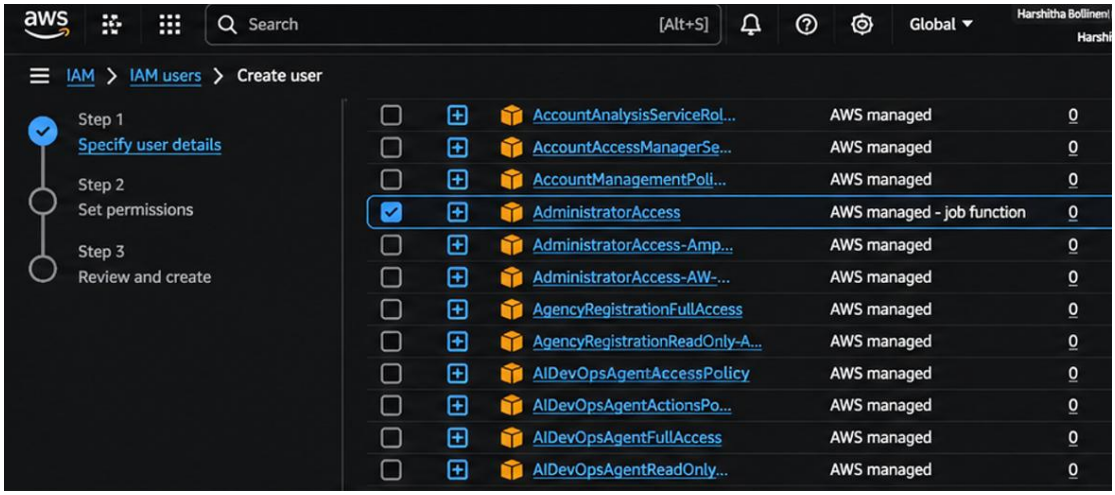

3. Specify User Details: Enter the username, enable AWS Management Console access, set a
custom password.

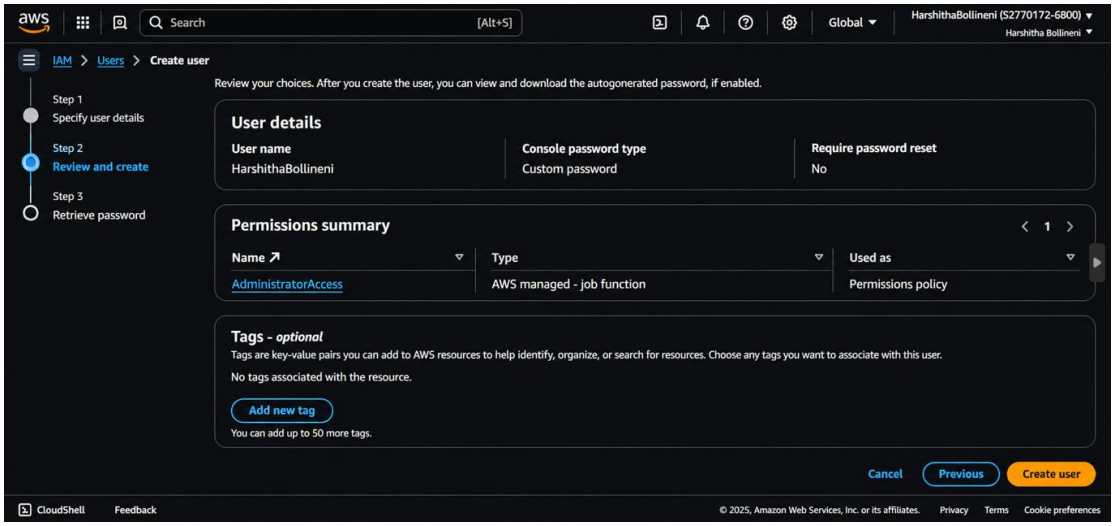

4. Set Permissions: Select Attach policies directly and choose the AdministratorAccess policy.

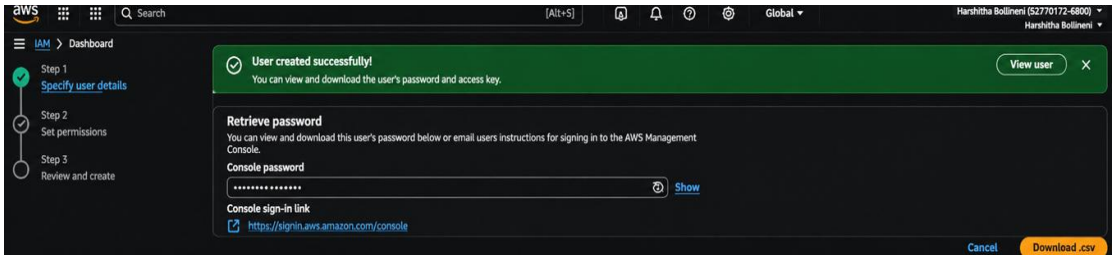

5. Review and Create: Verify the username and assigned permissions, then click Create user.

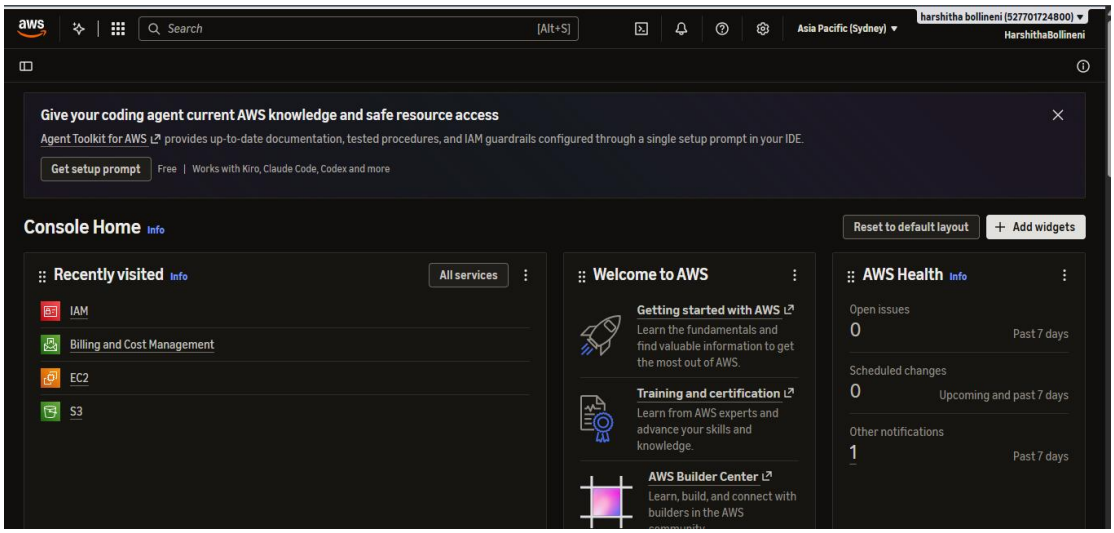

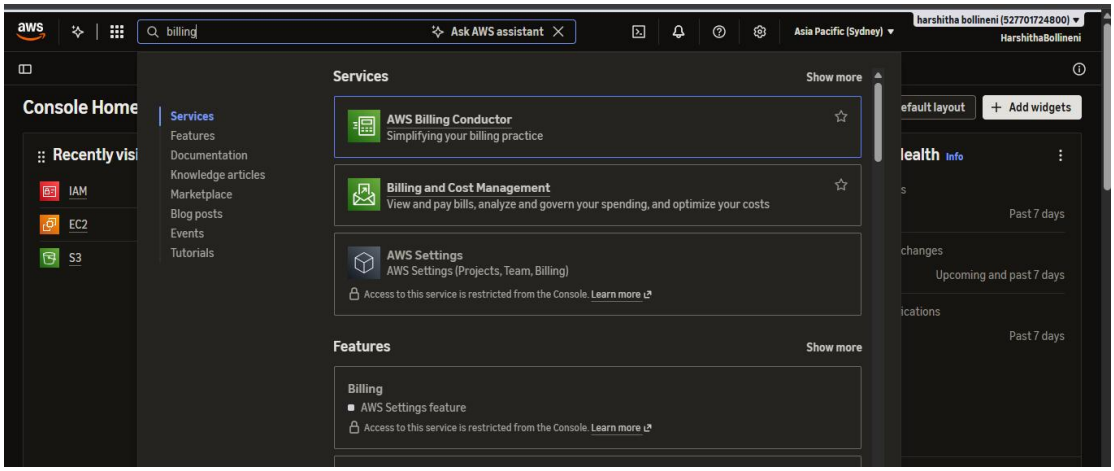

6. View the generated console sign-in details, including the sign-in URL, username, and
password, and download the CSV fle.

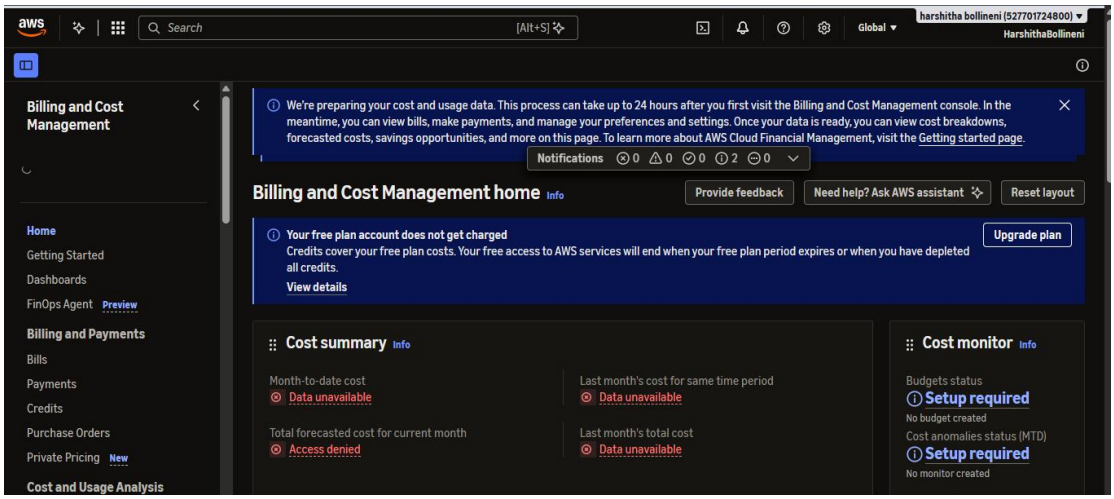

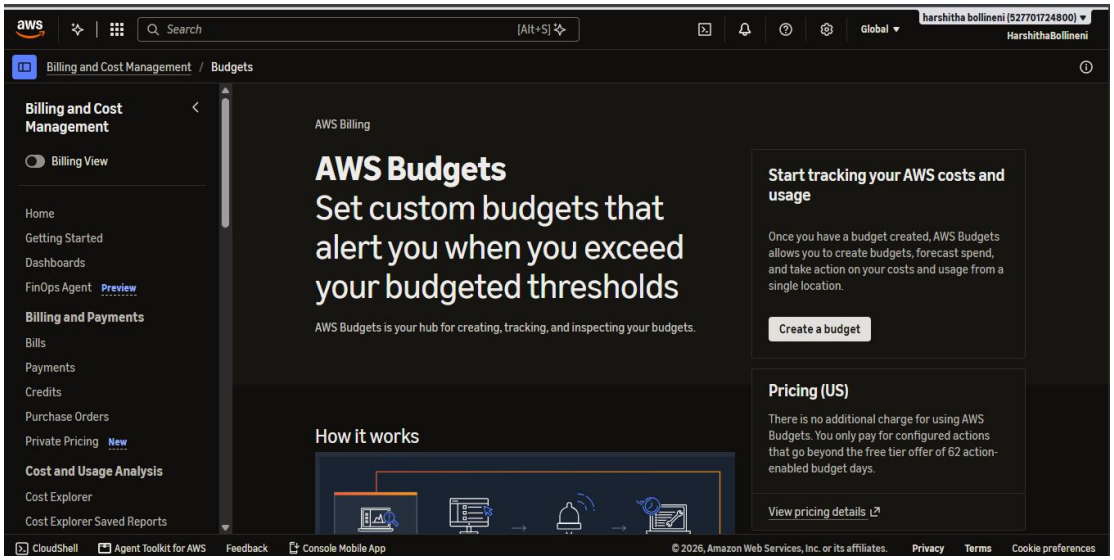

Billing Alert Set Up

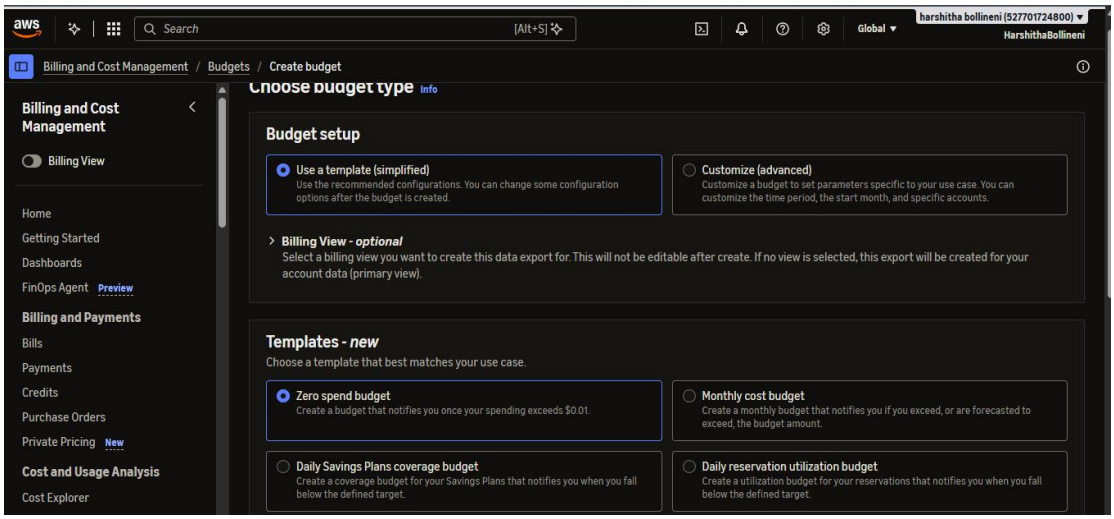

1. Search up billing and go to ‘Billing and Cost Management’

AWS Budgets
Set custom budgets that alert you when you exceed your budgeted thresholds
AWS Budgets is your hub for creating, tracking, and inspecting your budgets.
How it works
Start tracking your AWS costs and usage
Once you have a budget created, AWS Budgets allows you to create budgets, forecast spend, and take action on your costs and usage from a single location.
Create a budget
Pricing (US)
There is no additional charge for using AWS Budgets. You only pay for configured actions that go beyond the free tier offer of 62 action-enabled budget days.
View pricing details

Choose budget type info
Budget setup
Use a template (simplified)
Use the recommended configurations. You can change some configuration options after the budget is created.
Customize (advanced)
Customize a budget to set parameters specific to your use case. You can customize the time period, the start month, and specific accounts.
Billing View - optional
Select a billing view you want to create this data export for. This will not be editable after create. If no view is selected, this export will be created for your account data (primary view).
Templates - new
Choose a template that best matches your use case.
Zero spend budget
Create a budget that notifies you once your spending exceeds $0.01.
Monthly cost budget
Create a monthly budget that notifies you if you exceed, or are forecasted to exceed, the budget amount.
Daily Savings Plans coverage budget
Create a coverage budget for your Savings Plans that notifies you when you fall below the defined target.
Daily reservation utilization budget
Create a utilization budget for your reservations that notifies you when you fall below the defined target.

Budget types
Cost budget - Recommended
Monitor your costs against a specified dollar amount and receive alerts when your user-defined thresholds are met. Using cost budgets, the budgeted amount you set represents your expected cloud spend. For example, you can set a cost budget for a business unit and then add additional parameters such as the associated member accounts.

Attach actions - Optional Info
Using budgets actions
What is a budget action?
A budget action allows you to define and trigger cost saving responses to reinforce a cost-conscious culture. You have the option to attach actions that run whenever your alert threshold has been exceeded, such as stopping an EC2 instance from incurring any further costs. You can select the alerts to which you would like to attach actions, then define these actions.
How to get started?
To create a budget action, you will first need an alert threshold created from step 2. If you have already created an alert threshold select the type of action you want.
